No structure shall be erected, placed, altered or permitted to remain on any such lot other than one detached single family dwelling as defined above not to exceed two and one-half stories in height and such outbuildings as may be reasonably appurtenant to the dwelling, provided that the same are constructed in line with the general architectural design and construction standards used in the dwelling itself. All construction shall be custom type construction built on the lot and no old building constructed elsewhere shall be moved on to the lot for residential or any other purposes. No mobile homes, double wides or premanufactured homes or any unit requiring a Division of Motor Vehicles Certificate of Title shall be placed or constructed on any numbered lot in the subdivision hereinabove described. This covenant shall not be construed as prohibiting the use of a new single family detached dwelling as a model home for sales purposes.

ARTICLE III - NATIVE GROWTH

The native growth of such premises shall not be permitted to be destroyed or removed except as necessary to erect structures, to construct driveways and other graveled areas, to provide solar access and a reasonable area surrounding buildings.

BOOK 930 PAGE 856

and back lot lines, and right at any time in the future to grant a right-of-way under, over and along said easement along the side, rear and front property lines of each and every lot in the subdivision described herein, for the installation and maintenance of poles, lines, conduits, pipes and other equipment necessary to or useful for furnishing of all utilities including, electric power, gas, telephone service, Cable TV, drainage, or other utilities including water and sewer service. Within these easements, no structure, fence, planting, or other materials shall be placed or permitted to remain which may damage or interfere with the installation and maintenance of utilities, or which may change the direction of flow of drainage channels in the easements, or which may obstruct or retard the flow of water through drainage channels in the easements. The easement area of each lot and all improvements in it shall be maintained continuously by the owner of the lot, except for those improvements for which a public authority or utility company is responsible.

ARTICLE V - DWELLING, QUALITY AND SIZE

An error of not more than ten (10) percent in the location of a building on the lot with respect to the minimum setback lines or side or rear lot line setbacks shall not be considered a violation of this covenant.

ARTICLE VII - SOLAR ACCESS NEEDS

No property owner shall be allowed to erect any object or structure or plant additional trees, shrubs, or other forms of vegetation to grow in a manner that would block or impede another property owner's solar collector or reflector or solar system from obtaining solar access needs. Native trees and vegetation already on the lot shall be maintained in such fashion as to give minimal hindrance to other's solar access needs. "Solar access needs" are defined as the requirements for clear and unobstructed access to solar rays for the operation of a solar system. This paragraph shall apply only to the solar system located with the setback lines as defined in Article VI above.

Prior to the erection of any object or structure on his property of a height of more than twenty (20) feet, other than a residence, which residence shall be located on the lot taking into consideration all building lines which pertain to the lot in question, the property owner shall notify the adjoining property owners and obtain their permission. Permission can only be refused on the ground that said object or structure intrudes upon a property owner's solar access needs as set forth above. In the event of disagreement, said dispute shall be submitted to arbitration under the rules of the American Arbitration Association and the decision thereof shall be final.

In the event a property owner notifies an adjoining property owner that his trees, shrubs or other forms of vegetation are blocking or impeding said property owner's solar access needs, said property owner shall at his own expense remedy said

This shall be determined insofar as area is concerned as being of sufficient area to build on if said remaining portion of said lot is as large or larger than the smallest numbered lot in the above described and referred to subdivision and the dwelling placed thereon shall meet the minimum size requirement and be placed on the lot so as to meet the minimum size requirement and be placed on the lot so as to meet the minimum building line setbacks and side and rear line setbacks as hereinabove set out in Article VI. All numbered lots on the above described plat may be built on insofar as area is concerned.
